

PLANT ENGINEER

\$100,000 - \$125,000 – compensation negotiable based on experience

Overview of Position:

Manage, plan, and execute Capital and Expense projects in support of our capital expansion and equipment upgrade objectives

Responsibilities:

- Manage multidiscipline projects ranging from design, build, and installation projects for large forging equipment (furnaces, forging presses, etc.) to plant expansions
- Proven involvement and interaction with all project team members, including Maintenance, Operations and Management
- Develop and coordinate equipment overhaul and upgrade projects
- Coordinate and review the work of Sub Contractors and maintenance staff who are participating in capital projects
- Develop and execute Project Work Plans and Schedule activities for capital and major expense projects
- Support capital equipment purchasing (requirement definition, product and supplier evaluations, buy vs. build exercises)
- Participate in Greenfield plant design, construction, and commissioning projects
- Complete machine design and equipment layout assignments
- Provide guidance, direction, and design upgrades for existing equipment

Experience:

- Mechanical or Industrial Engineer or equivalent experience with a minimum of 5 years' experience in heavy industry
- Proven large project management experience related to heavy equipment procurement and installation as well as industrial construction
- Solid understanding of large hydraulic systems, presses, cranes, mobile equipment, and heavy machine tools
- Proficiency in AutoCad is required
- Heavy machine design experience is an asset
- Experience managing contractors, machine design and build companies, and trades

. This is an active job opportunity.
